DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Murray et al. (US 6,007,190).

Murray et al. discloses all the claimed features of the invention including:

- an apparatus (Fig. 10) comprising:
 - at least one print head (26);
 - a movable component (22) attachable to a flexible cable carrier (28), said flexible cable carrier being coupled to said at least one print head (Fig. 10), and an isolating component (38, 48) attachable to said movable component, for isolating uncontrolled movement and vibration of said flexible cable carrier from said at least one print head (Fig. 10).

Allowable Subject Matter

2. Claims 2-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

3. Claim 6 is allowed.

Reasons For Allowance

4. The combination or method as claimed wherein said movable component comprises a plate attached at one end to said flexible cable carrier (claim 2) or said isolating component comprises a linear bearing track (claim 3) or attaching a pin to a second end of said movable component, said second end being distal from said first end; and attaching a receiver to said print head, said receiver being configured to receive said pin and allow said pin freedom of movement in one direction (claim 6) is not disclosed, suggested, or made obvious by the prior art of record.
